**Amendments to the Claims**

The listing of claims will amend and withdraw certain prior claim versions, and listings, of claims in this application as discussed with patent examiner in informal phone interview:

**Listing of Claims:**

Independent Claims: 3

Dependent Claims: 12

Claims 22, 23, 24, , 34, and 35 are withdrawn

Claim 30, is Canceled

21. (Currently Amended) A ~~shelter~~ photovoltaic canopy capable of producing electrical energy comprising:

a photovoltaic canopy defining a sheltered area thereunder, the sheltered area including at least one vehicle parking space, the photovoltaic canopy including an upper surface having a first photovoltaic device, and a lower surface having a second ~~photovoltaic device, and~~ a light emitting diode device, wherein the ~~first and second~~ photovoltaic device ~~are~~ is capable of producing an electrical current when exposed to light;

a supporting structure connected to and supporting the canopy and permitting substantially unobstructed access by a vehicle to the sheltered area; and

an electrical light emitting diode load operatively connected to the ~~first and second~~ photovoltaic devices for utilizing the electricity generated by the photovoltaic device when the photovoltaic ~~device~~ canopy is exposed to light;

wherein the shelter has no walls

2)

25. (Currently Amended) The ~~shelter~~ photovoltaic canopy of claim 21 wherein the first ~~and second~~ photovoltaic device ~~are~~ is selected from the group consisting of ~~crystalline photovoltaic systems~~, flexible thin film photovoltaic systems, and the second device consists of stacked photovoltaic layers and photovoltaic and light emissive layers.

2)

26. (Currently Amended) The ~~shelter~~ photovoltaic canopy of claim ~~25~~ 21 wherein the ~~first and second photovoltaic canopy devices are~~ is transparent.

27. (Currently Amended) The ~~shelter~~ photovoltaic canopy of claim ~~26~~ 21 wherein the transparent ~~first and second photovoltaic devices canopy are~~ is composed of multiple layers of flexible thin transparent photovoltaic material.

3)

28. (Currently Amended) The ~~Shelter~~ photovoltaic canopy of claim 21, further comprising:

an organic artificial light source layer associated attached with to the underside of the canopy;

wherein the ~~second photovoltaic~~ artificial light source information display device layer is directed toward the ground to receive light from the artificial light source and;

wherein the upper surface of the photovoltaic canopy is oriented to receive sunlight directly.

4)

29. (Currently Amended) The ~~shelter~~ photovoltaic canopy of claim ~~20~~ 21 wherein the artificial light ~~is~~ source layer is dispersed within the ~~second photovoltaic device canopy~~.

5)

31. (Currently Amended) The light emitting diode device of claim 21 ~~wherein the light emitting diode~~ is capable of displaying human readable information; and

act as an information display.

32. (Currently Amended) The device of claim 21 wherein the light emitting diode is a ~~flexible thin film~~ organic light emitting diode layer capable of acting as an information display.

6

33. (Currently Amended) A ~~shelter~~ photovoltaic canopy capable of producing electrical energy comprising:

a canopy defining a sheltered area thereunder, the sheltered area including at least one vehicle parking space;

a supporting structure connected to and supporting the canopy and permitting substantially unobstructed access by a vehicle to the sheltered area;

~~a photovoltaic canopy device associated with the canopy, the photovoltaic device being is~~  
capable of producing an electrical current when exposed to sunlight, the photovoltaic  
~~canopy device including~~ includes a light emitting coating layer attached to the underside;  
and the photovoltaic ~~canopy device and is~~ capable of generating electricity from the light  
emitted by the ~~light emitting coating layer;~~ and

an electrical light emitting layer load is operatively connected to the photovoltaic canopy  
~~device~~ for utilizing the electricity generated by the photovoltaic canopy device when the  
photovoltaic canopy device is exposed light to sunlight and artificial light emitting light  
layer;

wherein the shelter has no walls.

1)

36. (Currently Amended) A ~~carport~~ photovoltaic canopy comprising:

at least one canopy, the photovoltaic canopy sheltering a parking area for at least one vehicle;

an indirectly mounted foundation, laterally placed supporting structure connected to and supporting the photovoltaic canopy and permitting substantially unobstructed access by a vehicle to the parking area space;

~~a photovoltaic device associated with the canopy, the photovoltaic device canopy being capable of producing a DC electrical current when exposed to sunlight, the photovoltaic canopy device including having an upper surface area panel; and~~

a lower surface area, including a light emitting diode coating panel attached thereunder; and the photovoltaic canopy device is capable of generating electricity from the light emitted by the light emitted diode coating panel; and

an electrical load operatively connected to the photovoltaic device canopy for utilizing the electricity generated by the photovoltaic canopy device when the photovoltaic canopy device is exposed to light sunlight and artificial light panel, wherein the electrical load is selected from the group consisting of the power distribution grid of a utility company and a battery.

37. (Currently Amended) The ~~earport~~ photovoltaic canopy of claim 36 wherein the load comprises a battery which is charged by the DC current produced by the photovoltaic ~~device canopy~~.

38. (Currently Amended) The ~~earport~~ photovoltaic canopy of claim 36 further comprising: an inverter for converting the DC electrical current produced by the photovoltaic ~~device canopy~~ to an AC current; and

~~a connection for~~ transmitting the AC electrical current to a power distribution grid of the utility company

9)

39. (Currently amended) The ~~carport~~ photovoltaic canopy of claim 36 further comprising a reverse meter for measuring AC current produced by the inverter.

40. (Currently Amended) The ~~shelter~~ photovoltaic canopy of claim 36 wherein the ~~canopy photovoltaic canopy~~ each includes a plurality of at least two ~~of~~ panels, each including the upper surface panel being having a first photovoltaic device, the lower surface having a second ~~photoelectric device~~, and the light emitting diode ~~device panel~~ attached thereunder, wherein the light emitting diode is an information display.

41. (Currently Amended) The ~~shelter~~ photovoltaic canopy of claim 36 ~~wherein,~~ wherein the position of the canopy panels ~~is~~ are tiltable and adjustable.

22. (Withdrawn) The shelter of claim 21 wherein said photovoltaic device is the first and second photovoltaic devices are supported by the canopy.

23. (Withdrawn) The shelter of claim 21 wherein said photovoltaic device is the first and second photovoltaic devices are contained on or in the canopy.

24. (Withdrawn) The shelter of claim 21 wherein said photovoltaic device forms the first and second photovoltaic devices form the canopy.

30. (Canceled)

34. (Withdrawn) The shelter of claim 21 wherein the electrical load is selected from the group consisting of the power distribution grid of a utility company and a battery.

35. (Withdrawn) The shelter of claim 34 wherein said battery is operatively connected to a light which illuminates said sheltered area.

11)
